Subject Name: Cloud Computing			
Course Code : BVSD-322	Semester: II		
Weekly Teaching Hours: TH: 03 Tut: 00	Scheme of Marking TH: 50 IA: 50 Total: 100		
TH Exam Duration: 03 Hours	Scheme of Marking PR:		
Credit :03			

Course Objectives :

• To understand the principles and paradigm of Cloud Computing

- To appreciate the role of Virtualization Technologies
- Ability to design and deploy Cloud Infrastructure
- Understand cloud security issues and solutions

Course Outcomes :

It provides a way to centralize the setup, implementation, maintenance, and management of integrated computation services to individual and corporate end users.

	Contents	Hours
1	Introduction to Cloud Computing Overview Layers and Types of Cloud, Desired Features of a Cloud, Benefits and Disadvantages of Cloud Computing, Cloud Infrastructure Management, Infrastructure as a Service Providers, Platform as a Service Providers, Multitenant Technology. Cloud-Enabling Technology: Broadband Networks and Internet Architecture, Data Center Technology, Virtualization Technology. Infrastructure as a Service, Platform as a Service, Software as a Service, Cloud Deployment Models.	13
2	Abstraction and Virtualization Introduction to Virtualization Technologies, Load Balancing and Virtualization, Understanding Hyper visors, Virtual Machines Provisioning and Manageability Virtual Machine Migration Services, Provisioning in the Cloud Context Virtualization of CPU, Memory , I/O Devices, Virtual Clusters and Resource management	12
3	Programming, Environments and Applications	9

	 Features of Cloud and Grid Platforms, Programming Support of Google App Engine, Programming on Amazon AWS and Microsoft Azure, Emerging Cloud Software Environments, Applications: Moving application to cloud, Microsoft Cloud Services, Google Cloud Applications, Amazon Cloud Services, Cloud Applications. 	
4	Security In The Cloud Security Overview – Cloud Security Challenges and Risks – Software-as-a-Service Security – Security Governance – Risk Management – Security Monitoring – Security Architecture Design – Data Security – Application Security – Virtual Machine Security - Identity Management and Access Control, Disaster Recovery in Clouds	11

5	Software Testing Life Cycle:	6
	Requirements Analysis/Design, Traceability Matrix, Test Planning, Objective, Scope of Testing, Schedule, Approach, Roles & Responsibilities, Assumptions, Risks & Mitigations, Entry & Exit Criteria, Test Automation, Deliverables.	
6	Test Cases Design:	5
	Write Test cases, Review Test cases, Test Cases Template, Types of Test Cases, Difference between Test Scenarios and Test Cases. Test Environment setup, Understand the SRS, Hardware and software requirements, Test Data.	
7	Test Execution:	5
	Execute test cases, Error/Defect Detecting and Reporting, DRE(Defect Removal Efficiency), Object ,Types of Bugs , Art of Debugging,. Debugging Approaches, Reporting the Bugs, Severity and priority, Test Closure, Criteria for test closure, Test summary report	
8	Test Metrics:	2
	Test Measurements, Test Metrics, Metric Life Cycle, Types of Manual Test Metrics.

Conferencing, Chatting Bulleting, Building Online Community,
Asynchronous / Synchronous Learning, Case Study

Books:

- 1. Internet (Use of Search Engines Google & yahoo etc)
- 2. E-Commerce :C.V.S.Murty
- 3. Fire Wall and Internet Security: William Cheswick, Stevens, Aviel Rubin
- 4. The Essential Guide to Knowledge management : AmritTiwana
- 5. The GISBook:GeorgeB.Karte.
- 6. Management Information System: Laudon&Laudon

Text Books :

1. E – Commerce : Milind Oka

BVSD - 325: Lab Course on Android application development

Practical Assignments

Sr.	Assignment
No.	
1	Introduction to Android
	Install Android Studio and build simple Hello World application.
2	Activities, Fragments and Intents
	1. Design Login Activity shown below.
	2. Create application to display details of selected list item on second activity (Use Fragmentation).
	3. Create first activity to accept information like first name, last name, date of birth, email-id and display all information on second activity when user click on submit
	button.

Android User Interface and Event Handling
1. Create the simple calculator shown below. Also, perform appropriate operations.
2. Create application to calculate GPA.
3. Create chat application.
Designing Your User Interface with Views
1. Create a custom "Contact" layout to hold multiple pieces of information, including:
Photo, Name, Contact Number, E-mail id. 2. Create application to demonstrate date
and time picker.
Displaying Pictures and Menus
1. Construct an app that toggles a light bulb on and off when the user clicks on toggle
button.
2. Create application as shown below.
3. Create gallery application to display all images date wise (Use Grid View).
Databases – SQLite
1. Create login activity (referAssignment 2 Example 1). If Email and password matches
with database display "login successful" message else display error message.
2. Construct a simple notes list that lets the user add new notes but not edit them.
Demonstrates the basics of ListActivity.Use a SQLite database to store the notes.
3. Create tables: Course (id, name, and instructor) and Student (id, name). Course and
Student have a many to many relationship. Create a GUI based system for performing
the following operations on the tables:
1. Course: Add Course, View All students of a specific course
2. Student: Add Student, Delete Student, View All students, Search student
Massaging and E mail
Messaging and E-mail 1. Create application to send and receive messages.
2. Create application to send email with validation.
3. Create application to send email with validation.
5. Create application to send email with attachment.
Location-Based Services and Google Map
1. Write a program to find the current location of an Android device and display details
of the place like Street name, city with Geocoding.
2. Write a program to track android device usingGoogle Maps.
3. Write a program todraw path along a route in Google map.
-

BVSD - 326: Lab Course on Cloud Computing

Practical Assignments

Sr.	Assignment
No.	
1	Working and Implementation of Infrastructure as a service.
2	Working and Implementation of Software as a service.
3	Working and Implementation of Platform as a services.
4	Practical Implementation of Storage as a Service.

5	Working of Google drive to make spreadsheet and notes.
6	Working and Implementation of identity management.
7	Write a program for web feed.
8	Execute the step to Demonstrate and implementation of cloud on single sign on.
9	Practical Implementation of cloud security.
10	Installing and Developing Application Using Google App Engine.
11	Installation and configuration of cloud Hadoop and demonstrate simple query.
12	Create a sample mobile application using Amazon Web Service (AWS) account as a cloud service. Also provide database connectivity with implemented mobile application
